Profile

I am Abdulaziz Sobirov Leading Frontend developer from Uzbekistan. I have 2+ year experience in coding. More info https://azizdev.uz

In 2020, I embarked on a journey to learn front-end web development and have since acquired a diverse range of essential skills. Through dedicated effort and learning, I have gained proficiency in HTML, CSS, SCSS, JavaScript, Vue, Nuxt, and Figma.

My understanding of HTML has enabled me to create structured, semantically meaningful web pages. By mastering CSS and SCSS, I have gained the ability to design visually appealing web pages. My knowledge of JavaScript has allowed me to add dynamic and interactive features to my web pages.

In addition, I have also gained experience with Vue and Nuxt, two popular JavaScript frameworks that facilitate building complex, modern web applications. And with Figma, I have been able to design and prototype user interfaces with ease and efficiency.

Overall, I am confident that my skills in front-end web development will enable me to contribute effectively to projects and add value to any team I join.

Courses

FrontEnd Development   2022
